

I will be able to identify equivalent ratios.

I will be able to find equivalent ratios using tape diagrams, double number lines, and tables.

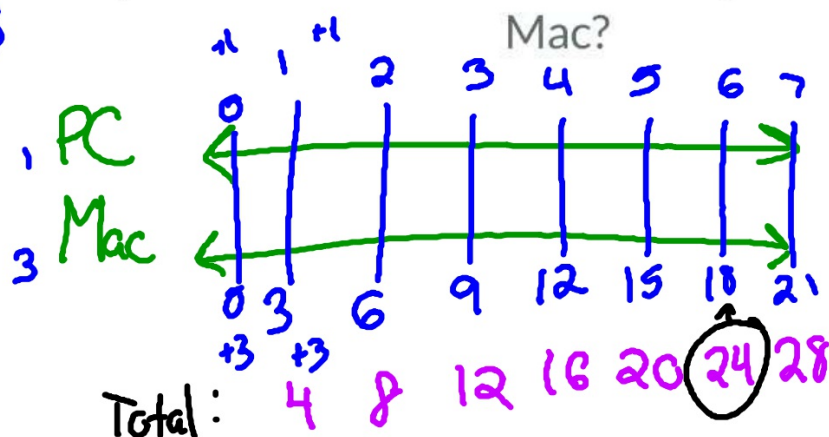

## Module 6 Lesson 3

**Equivalent Ratios**

## Method 4: Double Number Line

In the computer lab, there is 1 PC for every 3 Mac computers. If the computer lab has a total of 24 computers, how many are

1:3

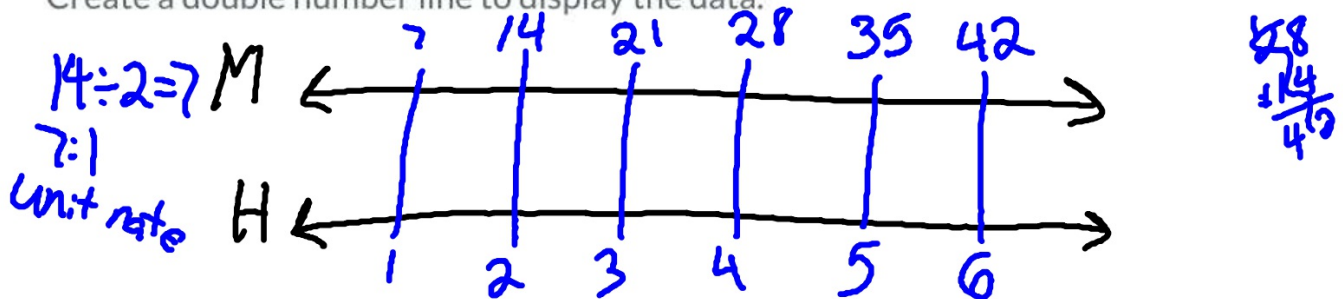

18 Macs

Rosina and Keith were rollerblading. They skated 14 miles in 2 hours

14:2

Miles	14	21	28	35
Hours	2	3	4	5

Create a double number line to display the data.

**Maria has 72 flowers in 4 vases**  $72:4$

Flowers				
Vases
